

PLANTING OXYGEN

PLANTOX PROJECT

By: Leia Anapaula Chavarria Davila

? FEEL ?

? PLANTOX PROJECT ?

DFC Student Council Initiative

How do you Feel about this issue?

I strongly feel about the topic. Trees are an important part of our eco system. This is most urgent and something that everyone can do!

So sad to see extreme climate change. As we can see, the climate change can damage our beautiful earth and I think the reason of how the climate change happen? Because human bad habit. And I think is a great global issue that should we discuss. We need a solution to make this effect of climate change can be minimalize.

I feel strongly about it. Small initiatives such as promoting projects could make a huge difference very soon.

I am very concerned that if we fail to make a change in time, this problem would affect all the inhabitants of the planet.

I feel that many trees are being cut down for the sole purpose of creating more pollution. This caused waters to rise making wildlife in the artic deplete.

The environment is THE MOST urgent issue in the world and for the world. It should be the number 1 concern of us all.

FEEL: MOTIVATION

- In Coronavirus times, oxygen has been the most demanded resource, which we would have liked to have foreseen. Actually, there is a problem that will demand more oxygen in the future, CLIMATE CHANGE. This issue could have the worst consequences in our future, causing wars by the lack of resources, massive immigration, thousands of deaths and extinction of species.
- Between 3.5 billion to 7 billion trees are being cut every year according to a report published by the Rainforest Action Network (RAN).
- Planting trees and reforest zones of our localities, are really good initiatives to produce oxygen, reduce our carbon footprint and help the environment.

? IMAGINE ?

? PLANTOX PROJECT ?

DFC Student Council Initiative

OBJECTIVE

- Reforest areas of our town to minimize the effects of climate change.

Specific objectives

- (1) Increase oxygen (O₂) production and carbon dioxide (CO₂) absorption.
- (2) Return the benefits of trees to the areas.
- (3) Beautify the local landscape.

❓ DO ❓

❓ PLANTOX PROJECT ❓

DFC Student Council Initiative

How to do the Project

- We create a local, regional and global network, and at a local level, we create a group with at least 10 people, where we will fulfill the requests of the people who donate to plant a tree by their name, birthday and another special data.
- The first 3 months we're going to plant 100 trees per country. We have 11 countries represented on our DFC student council, then we will plant 1,100 trees in the first trimester. In the national network, there are 60 members. At their local networks there are 10 members, then each one in the local network will plant 2 trees.

DO THE MATH!

- We will set the goals for the first 3, 6, 9 and 12 months (1 year)

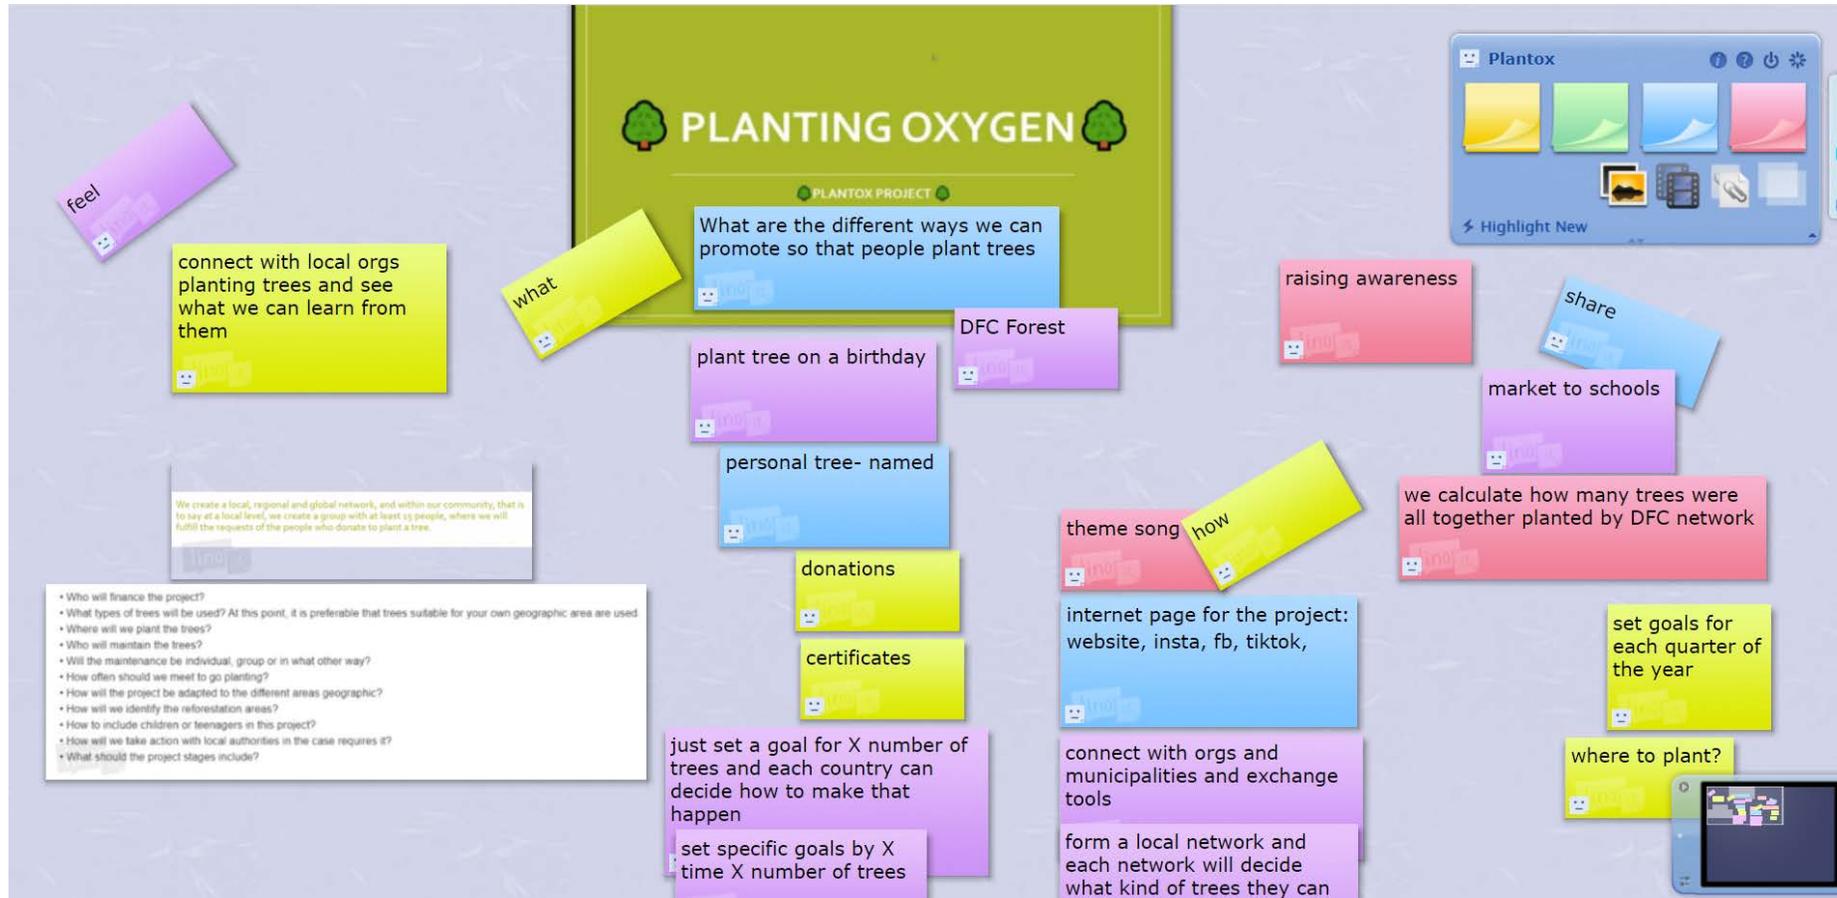

Suggestions

- Talk with the authorities of the localities we are going to go to plant trees.
- Identify the types of trees which can be planted in each zone
- Include schoolmates, children and other groups, like ambientalist and feminist groups.
- Join with organizations

Brainstorming

Plan of action

We can through Instagram share people in the project and let them be a part - Alma

Leia, Adopt a tree to take care of

(1) Create national network, (2) join with authorities, (3) get the trees, (4) go with our local network to plan the trees and make the activities proposed, (5) join with orgs and schoolmates from schools.

Maria Clara - I love the idea of giving a tree as a gift and I add that we should put some motivational phrases on the gift - Like "plant to change" and things like that

Sofia, Uruguay We plan to plant trees in our school and other edutive centers and then expand ourselves to all Uruguay. The flowerpots are going to be biodegradable so the only thing you have to do its dig a hole and water it

Daniel - • Speak to DFC USA Partner whether there is another organization I can collaborate with for the PlantOx. • I plan to plant at least one tree to help promote this movement. • If I think of any other ideas, I will add to this list.

Name of an organization that works with tree plantation in your community / country.

use Instagram to teach people how to plant

Daniel - • Ask community to adopt a tree and care for it. • Introduce a fundraiser to sponsor a tree

Maria Clara - I plan to involve also my family - my father really wants to help - so they can help and involve people they know

birthday present

share seeds from trees and have people plant them

Daniel's idea of planting one tree in a forest: take pic, invite press and social media, bring friends to do it too,

Tijana - once the planting organizations are identified and chosen, reach out to them after discussing the plan with the country coordinator

Leia: We create our local network, get in contact with the authorities in our cities, get the trees (most of them already grown), join with the team to go to plant (by people's name, special dates, etc) and also join with the strategical organizations, invite schoolmates and other people.

plant and adopt the tree you continue to look after

every parent with new baby gets a tree to take home

One tree can provide many seeds without hurting the tree. So we need to get lots of kids to be there to take the seeds and plant them

get our friends from school to join us planting

Collaborating with the organization, find a place for planting and determine which trees are suitable for the area. Get permission from the authorities.

social marketing of idea so other countries can join -ruthie

Go Fund Me Page

DESIGN for CHANGE GLOBAL

preparation: contact tree nursery, get friends to buy there

Maria Clara - find people who already work with projects similar to Plantox and clarify doubts to learn from them

Estamos creando macetas biodegradables, que nuestro profesor de Biología nos está enseñando, ahí plantaremos los árboles

Regalaremos árboles y ayudaremos a planta, primero en el centro de estudios, luego en la comunidad cercana, y así nos expandiremos por el país

Nuestro movimiento es Haka Eco, plantemos un árbol cuidemos el planeta

people with birds, use tree for home

identify organizations doing similar tree planting project and join them

? SHARE ?

? PLANTOX PROJECT ?

DFC Student Council Initiative

YOU CAN JOIN THIS INITIATIVE IN YOUR COUNTRIES AND NETWORKS
AND TOGETHER WE CAN HELP THE WORLD BREATHE AGAIN

WHAT IS THE STORY THAT WE WILL SHARE???

IT'S UP TO US

YES WE CAN!
